

# Pneumatic Bobbin Adaptor

Enables the reproducible processing of coreless bobbins on standard creels

Our pneumatic bobbin adaptors can be mounted on already existing 3-inch bobbin shafts of almost every creel system. The outside is made of an expandable rubber with aluminum strips which expands by using of compressed air.

Ø-Unexpanded: 156 mm

Ø-Expanded: 168 mm

Adapter Length: 280 mm

Adapter weight: 3,5 kg

Bobbin weight: 25 kg

Pressure: 4,0 bar

## Advantages in use

- Enables an external fiber pull-off on typical coreless bobbins
- Leads to a uniform radial expansion with a good bobbin concentricity
- Adaptable to nearly all common 3-inch bobbin supports or shafts
- Pluggable adaptor strips for bigger inner diameters are available
- Maintenance-free operation / proven industrial use for decades
